Purpose

Our students are in need of a targeted summer school program that focuses on grade level essential standards for ELA and math.

The purpose of this six week program is to address the skills needed for our students to be successful as they prepare to move to the next grade level. Keeven students will be assigned to their current grade level during summer school. The teachers at Keeven have designed a summer school program that is targeted to grade level essential standards for both ELA and math while also providing daily enrichment activities with special area instructors. We are delighted to offer this program to our Keeven families as an opportunity to provide our students targeted instruction that will prepare them for the upcoming school year.

Session Description and Grade Level Essential Standards

Each student will be assessed throughout the summer session. At the beginning of each session, teachers will assess where students are currently working in iReady. This combined with current SRI, running record levels, and priority standard scores will determine the course of study that students will work on. Teachers will have students independently working on their iReady placement levels and then pull small groups to work on essential skills for the grade level. Students will be assessed prior to the end of summer school to show growth.
