

Supplemental Resources for Families and Staff Guide

The Supplemental Resources for Families and Staff Guide is a living document that can help parents, caregivers, and school staff find valuable support for helping our students succeed in major academic areas. By remaining a live document, all stakeholders will be able to have the most updated and edited information regarding our resources.

Resources should be used to engage families in education and support our students throughout their time in the Hazelwood School District. Areas of focus are mental health services, family resources, medical services, preventative educational programs, substance abuse supports, career education programs, professional development, and academic partnerships. Each organization listed contains contact information for the unique user, a brief explanation of the support, and a description of how each resource is requested.

Please note that parents need to access the resource through their building principal or counselor to obtain it free of charge, as the district has a contract to pay for these services. If a parent does not follow this process, they will be financially responsible.

Hazelwood Supplemental Resources for Families and Staff
