## Lance Robertson net worth 2021 - this is the net worth of Lance Robertson

Robertson, also known as DJ Lance Rock, is a DJ, actor, and musician based in Los Angeles. He has a net worth of \$ 2 million. He gained his popularity through the famous show "Yo Gabba Gabba!", Which he hosted together with Scott Schultz.

DJ Lance Rock owes its popularity and wealth to the famous shows "Yo Gabba Gabba!" And "Yo Gabba Gabba - The Circus". Robertson was a singer in the band "My Other Self" and owned a record store called Deep Grooves. When he moved to LA, he became known in the indie rock scene there through his band "The Raymakers". At this time he met Scott Schultz, who was part of the indie pop band "Majestic" from Orange County. They performed together on a couple of shows. Later, when Scott started Yo Gabba Gabba with him, he asked Robertson to act as a presenter. Lance also toured with "The Aquabats" and performed with DJ sets. He also danced.

Lance was born in 1965 and is from St. Louis, Missouri, USA. He graduated from **Hazelwood East High in 1983**. He was a singer in one of the local bands. He later moved to Los Angeles to make it big in his life.

Robertson began his acting career with Yo Gabba Gabba and that decision was certainly an important one in his career. The series has received critical acclaim. However, he started out as a DJ and then became a musician, but his current profession is acting. DJ Lance Rock is still known among the younger crowd for his television series Yo Gabba Gabba.

# Ameren : St. Louis-area schools save nearly \$2 million, reduce energy use by upgrading equipment

**ST. LOUIS** (Aug. 16, 2021) - Back to school is looking brighter this year for several St. Louis-area schools thanks to energy efficiency upgrades from [Ameren Missouri's BizSavers Program](#). Upgrades include brighter classrooms, more efficient heating and cooling systems, and significant cost savings.

St. Louis' second-largest district, [Hazelwood School District](#), also took advantage of \$840,000 in cash incentives to upgrade to LED lights at 33 buildings. This will save the district \$685,000 in annual energy costs. It will reduce Hazelwood's energy use by 8.5 million kWh, about the same amount used by more than 700 homes for a full year. The district's participation also earned the title of Ameren Missouri's BizSavers Program 2020 Energy Efficiency Champion, awarded for achieving greater energy savings than any other Ameren Missouri customer in 2020.

Ameren Missouri's BizSavers incentives aren't just for large school districts. St. Roch Catholic School, located north of Forest Park, will save more than \$26,000 in electricity costs annually, thanks to lighting and HVAC upgrades made with the help of more than \$37,000 in incentives.

'We're proud to help schools save money on their energy statements so they can devote even more resources to provide their students the best education possible,' said **Rich Wright**, manager of energy efficiency at Ameren Missouri. 'Working with schools of all sizes that are taking advantage of Ameren Missouri's cash incentives and the annual energy cost savings, we're able to identify numerous projects that pay for themselves quickly and provide ongoing savings for years to come.'

Since 2018, Missouri schools have saved more than \$7.9 million on their energy statements and conserved more than 91 million kWh of electricity as a direct result of energy efficiency upgrades. That's enough electricity to power nearly 7,800 homes for a full year. Ameren Missouri helped offset the districts' installation costs by providing more than \$12.5 million in incentives.

As part of its BizSavers program, Ameren Missouri provides cash incentives for energy efficiency upgrades, such as LED lighting, high efficiency HVAC and refrigeration systems, commercial-grade cooking equipment, motor controls/variable frequency drives and much more. The program is one of more than 26 energy efficiency programs offered by Ameren Missouri to help residential and commercial customers reduce energy costs. Ameren Missouri expects to invest \$226 million over the life of its energy efficiency programs, which in turn would provide \$592 million in benefits for customers.
